

De Anza College
Physical Science, Mathematics & Engineering Division
Meteorology 10L, Meteorology Laboratory

Section(s):	45779 and 46187, Spring, 2022
Instructor:	Alicia T. Mullens (She/Her... you may have heard me previously referred to as Terrence)
Telephone:	(408) 864-8676
Email:	mullensterrence@fhda.edu
Office Location	Online (at https://cccconfer.zoom.us/j/6625783048)
Office Hours(on Zoom):	M/W 11:30-12:20pm T/Th 12-12:50pm, and by Appointment (i.e. let me know a time that works for you, and I'm happy to make it work!)*
Classroom:	Online (100% Asynchronous)
Prerequisites:	Met 10 (Can be taken concurrently or you could have taken it years ago... I promise you won't be at a disadvantage)

Introduction

This syllabus is like the “Terms of Service” that you agree to when you download iTunes or anything else off the internet. However, this is shorter (and with less legal jargon) and I actually expect you to read it! Your continued enrollment is your agreement to abide by the syllabus, and you will be quizzed on it during our first quiz!

Course Description

Welcome to the wonderful world of Weather! Regardless of if a friend/counselor recommended this class to you, or you signed up because of RateMyProfessors, I'm really glad you're here! In this class, you'll get to work with the many data products, graphics and instruments that real life meteorologists use to forecast and understand the weather. Laboratory assignments will use information gathered from various data sources and the free lab manual. It may take a week to get the hang of things, but the class quickly becomes very doable, and in fact most people enjoy it.

Course Website and Communication

Everything you need for this course (Syllabus, Assignments, Lectures, etc.) can be found on the course page which can be accessed through Canvas. I will also make all communication (announcements/reminders, emails, etc) through the Canvas webpage. Please enable your Canvas settings to receive notification when an announcement is posted.

***Office Hours:** Given the weird time we're in, office hours are quite a bit different... I am regularly and diligently checking my email during the scheduled times above, but may not be logged on to my zoom office at the moment you sign on (to save bandwidth in

case I'm uploading other stuff)... if that is the case, wait a few moments... anytime someone logs on, I get a notification, and will instantly jump on.

Textbook and Course Materials:

1. *Investigations in Weather and Climate, 2nd edition* by Alicia T. Mullens (Free Download – Each Chapter of the lab manual will be available on the corresponding activity's Canvas page).
2. **Computer with access to the internet and browser that meets Canvas' system requirements** (Info: <http://www.deanza.edu/online-ed/students/>)
3. **Recommended: A webcam and access to a printer and scanner (you can get by without them, but they will make your life easier).**

Contacting Me:

If you need to get a hold of me for any reason, you can email me directly at mullensterrence@fhda.edu, or via the messenger on Canvas. I check my email often during business hours, less often at nights/weekends (please don't feel discouraged if I don't immediately reply to an email sent at 2:30am). **If, you do not hear from me within 24 hours (48 hours over the weekend), please re-send your email. I can't stress this enough... I always try to respond to an email, but depending on when I get it, it might slip through a crack, so please re-send if you don't receive a response within 48 hours... To repeat, if you don't hear from me within 48 hours, please re-send your email... I've had students email once, not follow up for a month, and then say "I emailed you, but you never responded." I promise you I'm not trying to ghost you... I just get really busy at times... it's okay to bump your email up the list.**

In the Classroom/Class Rules

Online Class: What's the Difference?

Because this is an online class, you are allowed to study/watch lectures/attempt assignments at your own leisure. However, online classes can be difficult, simply because they require more discipline than a traditional lecture. There are no meetings that you have to be present at... but you still need to be regularly involved in the class to succeed.

Assignments: This class will consist of **six modules, and three quizzes**. Each module will consist of a module discussion forums, three or four laboratory exercises (each lab will have a video demonstration). Expect each module to take approximately 6 hours, not including time spent studying/preparing for the class. We will do one module every two weeks. The module will be posted no later than **12am the Saturday** of the first week and due by **11:59pm the Friday of the second week**. In order to be prepared for the module quiz, I strongly recommend that you complete the module discussion and laboratory exercises PRIOR to attempting the quizzes.

A Word of Warning: While you are free to work on the modules at your leisure, I strongly urge you to **not wait until the last minute to submit a module activity**. If

anything causes you to submit any module activity after the deadline, regardless of reason, you will still be assessed a late penalty. Also, you are completely responsible for making sure that your work is submitted properly.

Getting off to a good start: Because it often takes a little time to get accustomed to online classes, nothing is due until the conclusion of the 2nd week of class (Friday, April 15th, 2022). However, I still expect you to begin working on class material as soon as the quarter begins. For census purposes, I must drop anyone who hasn't logged on or completed any work by 11:59pm on Sunday, April 17th. I will not make exceptions to this policy!

Attendance/Punctuality: You are expected to log in to the course website **at least twice per week**, and that is the bare minimum. You will be dropped from the course if you fail to log on for the first time by Sunday, April 17th, you fail to log on at least once each week, or if you fail to turn in at least one laboratory activity in a two-week period. Regardless, if you choose to drop the course, it is your responsibility to do so. If you fail to drop before the deadline, I will have to award you a grade, most likely an FW.

Lab Partners: In this class, you have the choice of either working on lab assignments on your own, or in groups of 2 or 3. However, each person must submit their own lab assignments, and may not work together on quizzes.

PLEASE READ: NORMALLY, it would be assumed that you are completing your course work at home, in the United States, with a high speed internet connection and access to Canvas and Zoom. HOWEVER, I know that the current circumstances surrounding COVID-19 have given each of you unique challenges, and I don't want anything to keep you from succeeding in this class... a list of resources available to you is given in Appendix B of this syllabus. I also encourage you to reach out to me specifically regarding any particular challenges you may have during this course.

Issues/Grievances: While I try my best to make this class a positive learning environment, there is always the chance that either something I or someone else in class does might not sit well with you; if that is the case, I am more than happy to hear any grievances in private. I've found that 99.9% of any issues that arise are easily settled (and to everyone's satisfaction) by a brief conversation. Pet Peeve: Saying something is "unfair" is not the way to solve your problem...

Working together: In this class, you have the choice of either working on lab assignments on your own, or in groups of 2 or 3. However, each person must submit their own lab assignments, and may not work together on quizzes. Furthermore, any written/problem solving/plotting work must be done in your own words... meaning three people can't turn in identical written answers... put it in your own words!

Assignments and Grading

Laboratory Assignments (18 @ 25 points each, lowest 2 dropped)...	400 pts
Quizzes (3 @ 50 points each, lowest dropped)...	100 pts
Total...	500pts

Grading Scale:

>90% = A, 80-89% = B, 65-79% = C, 55-64% = D, < 55% = F
+/- grades are assigned when a grade is within 2% of the next grade.

Note: I reserve the right to adjust this scale, but only to benefit you.

Laboratory Assignments: Each module will consist of three or four laboratory investigations from the Lab Manual. The labs will be submitted using an online form linked on the assignment's Canvas page. Because each laboratory assignment has a different number of questions, I scale each assignment to a point total of 25 (so that one lab doesn't carry a larger or smaller weight than another). All laboratory assignments are due at the end of the respective module, unless I announce an alternative due date.

Late/Makeup Policy: I'm piloting something a colleague of mine has done in the past this quarter... For every lab investigation and quiz (except quiz #3), I will make an automatic one-week extension available. Here's how it will work:

- **One week:** The extension gives you an extra week to complete an assignment from the published due-date.
- **It's automatic:** you do not need to request it, just utilize it.
- **No late penalties:** The assignment will show as "late" on Canvas, but I will not assess any late penalties.
- **Doesn't apply to Module 6:** I cannot offer this for Module 6 because the term ends right after the module is due. In recognition of this, I make Module 6 much shorter, and filled with extra credit.

Returned Work: It is your responsibility to hold on to any returned work until the conclusion of the quarter. In the event I made an error in your grade, you may need to present the assignment to me for verification.

Important Reminders: While these policies represent the "letter of the law," I will, in many cases, be gracious within reason. As the COVID-19 pandemic has dragged on, I've had situations where requests of leniency have become more extreme, and downright unreasonable, so I want to be clear here:

1. You are responsible for all content, assignments, and deadlines, **EVEN IF YOU HAVEN'T BEEN LOGGING IN**. Saying "oh, I haven't been here in the past two weeks" isn't a valid excuse (unless you have a legitimate, documented reason). If you need to miss a class session, I strongly recommend making a friend and having them fill you in on what you missed (at least in terms of assignments, etc).
2. I'm granting you an automatic extension for literally everything except the final! Emailing me in week 9 asking if you can make up an assignment from week 3 is **NOT** okay, and such requests will be denied... I'm not trying to be mean... just fair!
 - a. Seriously... I've had people email me in the last week or two of the course asking if I'll accept work from the first few weeks... the answer is no. I bake a lot of forgiveness (dropped assignments, extra credit) into my

grading, so, to quote the Beatles, if you missed something from earlier in the course, “Let it be!”

3. Once I announce a deadline in class (or on Canvas), you are expected to write it down and keep track of it... any additional reminders are a courtesy, and should not be relied on. I’ll always try to give a reminder, but I’m also human.

All of this being said, I seriously try to be gracious... I just want to make sure that I’m establishing a proper boundary, as a well trained therapist would say. If you need to miss a bunch of class, or encounter an issue, please reach out to me, and I’ll work with you... but don’t wait until after things have settled down to do so... the moment you need help, let me know!

Dropping

I will drop you if:

- You miss more than one complete module
- or-
- You fail to log on at least once a week for two consecutive weeks.

Otherwise, if you choose to drop the class, you must do so on your own. Failure to do so will result in you being awarded an FW, which is the equivalent of an F.

The Deadline to Drop this class with a W is Friday, May 27th

Other Policies

Disabilities: If you need any accommodation due to a disability (note taker, etc.), please don’t hesitate to let me know and I’ll be happy to help! All accommodations will need to be made through Disability Support Programs and Services (DSPS), which is located at RSS-141, or online at <https://www.deanza.edu/dsps/>.

Academic Integrity: I will NOT tolerate cheating or plagiarism of any kind! **This includes submitting work under a fake name in order to get answers prior to submitting your work.** While you’re allowed (actually, encouraged) to work together on labs, you must turn in your own answer sheet, **and in your own words!** **Multiple students submitting identical written answers is considered a violation of this policy!** The first offense results in a grade of “0” on the assignment and a stern warning. Any subsequent offense results in a report filed with student affairs. **Please note:** This has been getting increasingly problematic lately... I’ve seen lots of identical/nearly identical answers, many of them incorrect or including irrelevant information that was clearly taken off of a website (cough cough, Chegg... cough cough, Coursehero). If I notice you submitting such work, you’ll get a zero automatically. Also, if I catch anyone distributing answer keys/sharing them on Discord, posting them to Chegg, etc, I will report that offender to Student Affairs. I really don’t want to do that, but it’s gotten out of hand lately. I promise you that this stuff isn’t that hard with a little time and thought given to it, and I’m here to help.

Final Grade Changes: At the end of every term, almost without fail, at least one or two students approach me to ask for additional work/some leeway with their grade to earn a

higher grade. While I appreciate the gravity that grades can have, I need to both be fair to the rest of the class (I don't think other students would appreciate it if I just bumped another student's grade without merit, or gave them extra work without making it available to the rest of the class) and maintain my own academic integrity (i.e. I can get in trouble for awarding grades that were not earned), so I **must** deny all requests for a higher grade, except in instances where I made a mistake. However, I am more than happy to help you earn a good grade if you reach out to me for help before the end of the term. There will also be plenty of extra credit during the course.

TL;DR: Engage in the class, try your best, turn in your work on time, don't cheat/copy off of others/submit identical written work, and reach out whenever you need help and I promise you that I won't let you fail this class! Everything else is just details (still read them because I will adhere to them, but the gist is above)!

Important dates/deadlines:

Deadline to Add: 4/16

Deadline to Drop with Refund: 4/16

Deadline to Drop with a W: 5/27

Holidays: 5/30 (Memorial Day), 6/20 (Juneteenth)

Course Schedule

Date	Topics, Readings, Assignments, Deadlines
Module 1 4/6-4/15	Introduction to Course Lab 0: Orientation Lab Lab 1: Surface and Upper-Air Weather Module 1 Labs are due by 11:59pm on 4/15

Date	Topics, Readings, Assignments, Deadlines
Module 2 4/16-4/29	Lab 2: Heat, Radiation, and Seasons Lab 3: Air Temperature Applications Quiz #1 Module 2 Labs, and Quiz 1 are due by 11:59pm on 4/29
Module 3 4/30-5/13	Lab 4: Clouds and Moisture and Rising Air Lab 5: Weather Data, Satellite, and Radar Module 3 Labs are due by 11:59pm on 5/13
Module 4 5/14-5/27	Lab 6: Air Pressure Lab 7: Surface Winds Quiz #2 Module 4 Labs and Quiz 2 are due by 11:59pm on 5/27
Module 5 5/28-6/10	Lab 8: Upper Air Winds, El Nino and La Nina Lab 9: Fronts, Mid-Latitude Cyclones Module 5 Labs are due by 11:59pm on 6/10
Module 6 6/11-6/24	Lab 10: Thunderstorms and Tornadoes Quiz #3 Module 6 Labs and Quiz 3 due by 11:59pm on 6/24 (Please note: I cannot grant an extension on Module 6)

NOTE: This schedule is tentative and Subject to Change for any reason

Student Learning Outcome(s):

*Assess and defend the analysis and decision-making skills employed by meteorologists to diagnose air patterns, understand air motions and predict future atmospheric conditions.
