- c. Once all the desired selections have been made from the Filter sections, the data can be modified further by clicking on the arrows located next to the category header in the data table (see pink arrows when hovering over the column headers). A drop-down menu will appear and you will have the option to do the following:

- **Sort** the subgroups within a category A to Z or Z to A.
 - Note: The default view organizes the subgroups A to Z.

- **Filter** for a specific subgroup within a category
 - Note: The default view displays all the subgroups within a category. In this example, the data could be filtered so that first-generation college is disaggregated by female only.
